

# WE SPECIALIZE IN AUTOMATED TAIL THREADING

## Who We Are

We focus on robust design, quality equipment manufacturing, and reliable after-sales support. This complete life cycle threading service is what we're all about and what our customers like best about working with us.

## What We Offer

We provide a customized experience throughout the development of your equipment and maintain that relationship for years to come. We are committed to your success and will go the extra mile to ensure your satisfaction.

### Custom Designs

We gather data specific to your mill, and conduct a peer review to test our concepts before submitting for approval.

### In-House Manufacturing

All aspects of component manufacturing, assembly, and testing occur in-house at our North Vancouver facility.

### Reliable Service

Our team of technicians has seen it all, and their expertise and can-do approach to problem-solving help set us a tier above the competition.

## Our Worldwide Presence

We're privileged to work with clients worldwide, across a variety of different mill environments. Each installation has been personally visited and maintained by our staff.

**450+ Installations**

**140+ Cities**

**19 Countries**

### Continuous Vacuum Conveyor

Our continuous vacuum conveyor is suited for high-speed lightweights, market pulp, and everything in between.

### Edge and Felt Doctors

The Edge Doctor uses an 8 or 10-inch blade to peel the tail from a dryer can or calender roll. The Felt Doctor peels the tail from the felt, and is designed to prevent damage to the felt.

### SGC Tail Breaker

Our SGC features a simple, low-maintenance design and is the most effective high-speed tail breaker available.

### Calender Threader

This threader is used on three to eight roll stacks and for threading high-speed lightweights to board.
